

AirFree™ Dispensing Systems

LDS9000™ LDAV Linear Drive System

Available for free 30 day trial

Linear Dispensing Systems™—
The LDS technology gives you the accurate and repeatable method of positive displacement you want without the headache of pneumatic systems. No need to flush chambers or valves. Formulations stay untouched in safe, silicone-free syringes with this revolutionary new system. Change fluids or volumes with ease.

Unlike pneumatic machines, this intelligent dispensing system knows the syringe's size, volume and the dispense rate. The result: process control that is unachievable with pneumatic systems. For Application Assistance, call 800-433-2115.

- No Air—Electromechanical linear drive system
- Two year fault free warranty
- PosiLok™ connector
- 10 memory locations
- For use with 3, 5, 10 or 30cc syringes
- Inert all-plastic fluid container

Syringe Size	3cc	5cc	10cc	30cc
Min. Vol. (cc)	.00090	.00158	.00261	.00514
Max. Vol. (cc)	3.0	5.0	10.0	30.0
Min. Rate (cc/sec)	.023	.040	.065	.129
Max. Rate (cc/sec)	.552	.954	1.567	3.086
Max. Pullback (steps)	500	500	500	500
Max. Delay (sec)	9.99	9.99	9.99	9.99

Specifications

Input Voltage: 100 to 240 VAC

Control Unit Size: 5.3" x 8.75" x 7.25";
8.9 x 22.3 x 18.4 cm

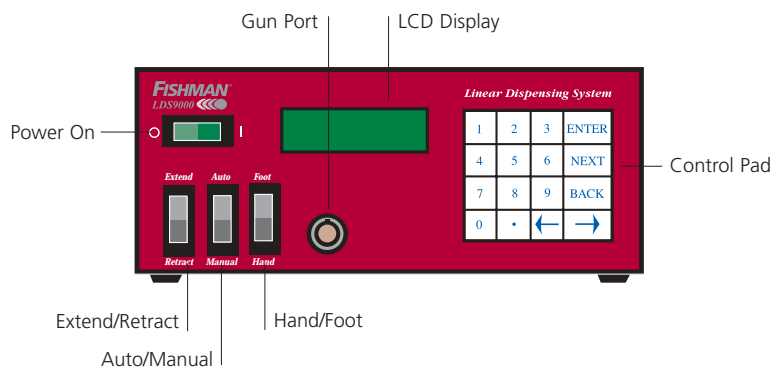

Dispensing Gun Length: 8.5"; 21.6 cm

Models

LDAV 3 or 5' gun cord all fluids

LDAV 3 or 5' gun cord extra-thick pastes

*Available with Starter Kits

Barrel Reservoirs (available in 5 sizes)

- Thickwall design eliminates flexing
- Precision molded zero degree taper assures smooth flow
- Disposable design eliminates need for cleaning

PosiLok™ Pistons

- AirFree™ design featuring patented positive lock piston attachment for positive displacement dispensing
- Precision molded for smooth flow and uniform advance
- Engineered to allow trapped air to escape while sealing in vapors and fluid

Dispensing tips (available in 3 styles)

- Ergonomic Surlock™ design locks securely to the barrel with a simple twist
- Multiple sizes and lengths available to satisfy any dispensing application

Fishman Corporation manufactures in a Certified Silicone Free environment, achieving close tolerance precision in an industrial grade system. Contact our Fluid Dispensing specialists to take advantage of our experience with thousands of successful applications and to pick the right components for your specific application needs.
