SmartDispenser® GUN STAND

Store the Dispense Gun, Reduce System Foot Print

SmartDispenser® Liquid Dispensing Dispense Gun Stand is a multi use product. The aluminum base provides four powerful suction cups that anchor the SmartDispenser® to the work bench preventing an unforeseen crash to the floor. The aluminum frame encases the SmartDispenser® providing a solid layer of protection from colliding with other heavy production tools on the workbench and reducing impact damage should the entire workbench overturn. A sturdy dispense gun stand attaches to the aluminum base providing the operator a convenient resting place for the SmartDispenser® dispense gun while not in use. The stand is on an industrial flex arm allowing it to be positioned in multiple locations for operator convenience. Installing a Dispense Gun Stand is an excellent way to protect your SmartDispenser® investment.

SmartDispenser® Triple Stack Gun Stand with or without Accessories

Add stacking rails, available two & three high, to the gun stand and reduce the SmartDispenser® footprint. Ideal for small tight work areas. Add a magnifying glass for micro assembly.
