# SmartDispenser®

SSDAV High Torque Fiber Optic Benchtop Automation System

SmartDispenser®
Super Small Dot Any Viscosity
Use this model for encapsulating fiber optic connectors, ideal for a blind fill into the fiber optic connector ferrule. The Smart Dispenser's patented ProcessControl2® was designed to provide the highest repeatability from one dispense to the next for single component and two component epoxy.

AirFree® Technology & Fiber Optic Connectors

The SmartDispenser® SSDAV-HT-FO Benchtop System is ideal for dispensing epoxies for bonding glass fiber to ceramic ferrules. The ProcessControl2® program manages two part epoxies, such as 353ND, and other fiber optic assembly fluids so each ferrule is filled without over flow or air gaps.

Traditional air pressure systems lack the repeatability from one fluid deposit to the next needed for fiber optic connector assembly. AirFree® technology stabilizes the fluid dispensing process providing the highest repeatability when compared to any fluid dispenser.
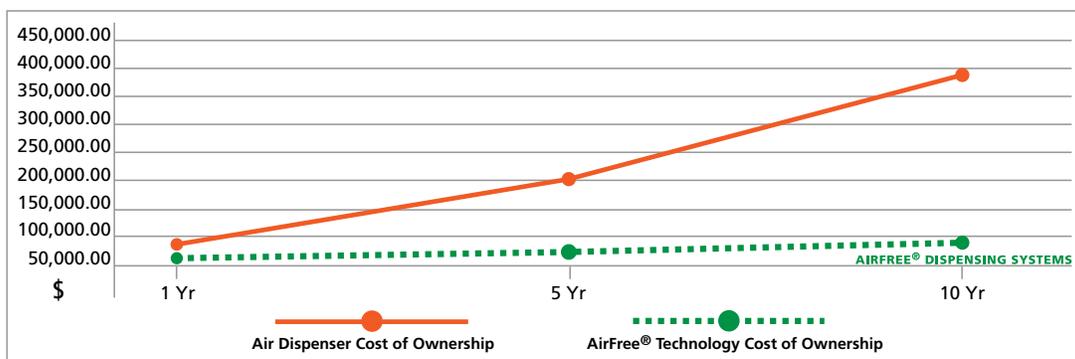

AirFree® Technology & Automation

AirFree® technology acts as an additional axis when mounted on a benchtop automation system. The precise control engineered into the X, Y and Z axis is now applied to the fluid delivery axis. All axes are motor driven lead screws with known speeds and can be coordinated providing the highest precision and repeatability available on a benchtop robot.

Genius® Dispensing Components

Genius® dispensing components have a thick wall design eliminating flexing and a zero draft assuring smooth flow. Disposable design eliminates the use of harmful cleaning agents such as mek or acetone. The polypropylene reservoir protects assembly workers from coming in contact with harmful assembly fluids. When empty the capped syringe acts as a sealed container making disposal easier and safer.

Hiflow™ dispense tips are made from 19g (.042"- O.D.) and 20g (.035"- O.D.) which fit perfectly into the fiber optic ferrule's port. The inner diameter of both tips are 15% larger allowing for a higher flow rate of fluid which eases the ferrule filling process.

What makes the SmartDispenser® so smart?
The combination of 3 powerful platforms.

AIR-FREE MANUFACTURING
- One program – worldwide
- Closed-loop feedback
- 6-10X more repeatable than pneumatics
- Volume base numeric dispensing
- Positive displacement via stepper motor
- Firmware proven for over a decade
- Eliminates expensive air compressor
- Designed to integrate into automation systems using PLCs

WINDOWS 7 NETWORKING
- SD Device to MES System Networking
- Remote programming and lock out
- Real time production data
- Live video feed
- Auto e-mail of unauthorized program changes
- On screen work instruction (audio option)
- Connectivity between SmartDispensers® Desktop, Laptop and Smartphone.
- Video/Audio training and tutorials

SMARTPHONE FUNCTIONALITY
- Touch screen
- Finger gesturing controls
- MES Networking Apps
- Custom Manufacturing Apps

JANOME FEATURES

High Precision

High Rigid Structure
A solid aluminum alloy is employed on the base and an aluminum alloy extention with a high rigid section is employed on the column

Labyrinth Mechanism
A social labyrinth mecharism underneath the work table keeps foreign oblects (e.g. screws, liquid or dust) out.

X TABLE

X TABLE

LABYRINTH STRUCTURE

ORDINARY STRUCTURE

Smooth Movement
Smooth movement is attained with the micro-step controle system

Flexible Interface
• RS-232C port for PC connection
• RS-422 port for teaching pendant
• I/O (Output 16, Input 16)

User Friendly

Clear Wide Screen
Wide and easy viewable teaching pendant screen
Language: English/German/Japanese etc..
Measurement: mm/inch

Simple Teaching
Using the JN C-Points software users can teach dates easily. It also has commands to operate particular jobs. Users can also create their own original software.

Simple Teaching
Using the JN C-Points software users can teach dates easily. It also has commands to operate particular jobs. Users can also create their own original software.

Enhanced Memory Capacity
Up to 255 programs (2.5 times that of the exitisting model) and 30,000 points (increased 5-fold) can be stored as teaching data.

Simple Sequencer
The robot has a built-in simple sequencer which functions independently (it is not necessary to add more hardware in the case of siumple PLC connection).
