

AIRPULSE™ RESERVOIR FILLER

Ideal for Nonpourable Fluids-Full Production

Non-Pourable Fluid Syringe Filling System

The non-pourable fluid syringe filling system will provide a simple filling solution for high production yields for non-pourable fluids such as sealants, greases, silicones, gels, thick pastes and vinyl adhesives that come packaged in bulk containers. Easily transfer your non-pourable fluid from a 5 liter pressurized reservoir to AirPulse™ or AirFree® syringes. Our reservoir filler system makes the operation fast, easy, accurate and clean.

Fluids

- Adhesives
- Sealants
- Greases
- Non-pourable fluids pre-packed in cartridges
- Lubricants
- Epoxies
- Vinyl adhesives
- Thick pastes
- Gels
- Silicones
- Gasketing Sealants
- Creams

Features

- Accommodates 3cc to 55cc syringes
- Ideal for short production runs or fully automated filling
- Fast and accurate filling
- Simple set-up and clean-up
