## Models

- C463611 110V-Three Prong
- C463621 220V-Three Prong
- C463631 220V-Two Prong

## Pourable Filling System

The filling system will provide a simple filling solution with pourable fluids such as solvents, anaerobics and cyanoacrylates. Easily transfer your pourable fluid from large containers to AirPulse™ or AirFree® syringes. Our reservoir filler system makes the operation fast, easy, accurate and clean. The system can accommodate 1 pound bottles or simply pour your fluid into a disposable liner.
