- Ideal for short production runs
- On/Off toggle switch for easy operation
- Fast and accurate filling
- Simple set-up and clean-up

Caulking Style Syringe Filling System

The caulking style syringe filling system will provide a simple filling solution for fluids pre-packaged in caulking cartridges such as vinyl adhesives, silicones, greases and sealants supplied in 10.6oz (caulking) cartridges. Easily transfer your thick fluid from standard caulking sealant cartridges to AirPulse™ or AirFree® syringes. Our reservoir filler system makes the operation fast, easy, accurate and clean.

Model

C400001

10.6 oz.
