

SmartDispenser® Table Mount

AirFree® Dispensing Systems

Protect Your Investment Secure the SmartDispenser® Reduce System Foot Print

The SmartDispenser® Table Mount is a cast aluminum shell that the SmartDispenser® control unit slides into. Four powerful suction cups secure the control unit to the table: when entering program parameters via the touch screen the control unit stays in place. Securing the SmartDispenser® to the workbench eliminates any chance of the control unit being dislodged from the work station and crashing to the floor. The cast aluminum frame incases the SmartDispenser® control unit providing a solid layer of protection from colliding with other heavy production tools on the workbench. The SmartDispenser® Table Mount provides protection for your SmartDispenser® investment, increases productivity and provide a clean, efficient work space.

SmartDispenser® Triple Stack Table Mount

Add stacking rails, available two & three high, to the gun stand and reduce the SmartDispenser® footprint. Ideal for small, tight work areas.
